Contents Volume 35

Vol. 35, No. 1, September 1992

Practical die design via section analysis
Y.T. Keum, C.-T. Wang, M.J. Saran and R.H. Wagoner
(Columbus, OH, USA) 1
Effect of core insulation on the quality of the extrudate in canned extrusions of γ-titanium aluminide
R.L. Goetz, V.K. Jain and C.M. Lombard (Dayton, OH, USA) 37
Workability of unidirectionally solidified Al–8 wt% Cu alloy: Part I. Cold workability
M.A. Taha, N.A. El-Mahallawy and T.A. El-Benawy (Cairo, Egypt) 61
Workability of unidirectionally solidified Al–8 wt % Cu alloy: Part II. Hot workability
M.A. Taha, N.A. El-Mahallawy and T.A. El-Benawy
(Cairo, Egypt) 71
Electrochemical polishing of biomedical titanium orifice rings
S.C. Tam, N.L. Loh, C.P.A. Mah and N.H. Loh (Singapore) 83
Modelling of metal extrusion using the PHOENICS package
D. Bhattacharyya, P.J. Richards (Auckland, New Zealand)
and A.A. Somashekar (Thomastown, Vic., Australia) 93
On the life of an ion-nitrided HSS cutting tool
M.A. Béjar and N. Vranjican (Santiago, Chile) 113

Diary of Events 121

Vol. 35, No. 2, October 1992

Elasto-plastic finite-element analysis of V-shape sheet bending
Y.-M. Huang, Y.-H. Lu (Taipei, Taiwan) and A. Makinouchi
(Saitama, Japan) 129
A coupled analysis of visioplasticity in plane extrusion with the flow-function elemental technique
Y.-T. Lin and J.-P. Wang (Taipei, Taiwan) 151
On the formability of 3.15 mm thick low-carbon steel sheets
P.P. Date and K.A. Padmanabhan (Madras, India) 165
A method for the machining of thin-walled cylinders
J. Deng and S.K. Deng (Shiyan, China) 183
CAD system for the elastic-medium shaping of pipe-line parts
G.D. Del, V.V. Eliseev, S.A. Erbeigel, E.I. Pismenny and S.A. Vulman
(Voronezh, Russian Federation) 191
Bulging and folding-over in plane-strain upset forging
Jin Hou, U. Ståhlberg and H. Keife (Stockholm, Sweden) 199

Elsevier Science Publishers B.V.

Critical conditions for wrinkling during the forming of anisotropic sheet metal
A.M. Szacinski and P.F. Thomson (Clayton, Vic, Australia) 213
The fabrication of eccentric stepped-shaft forgings using the process of cross-wedge rolling
G.S. Ren, Z.B. Bai, C.J. Zhang (Changchun, China) and Z.Y. Hong (Jilin, China) 227
Study of the forming limit of superplastic bulging
D.-J. Wang (Nantong, China) and J.-C. Zhao (Harbin, China) 237

Vol. 35, Nos. 3&4, October 1992

Special Issue: Selected Papers from the International Conference on Cold and Warm Forging Technology 1992, Columbus, OH, USA, October 27–28, 1992

Preface iii
Contents v

1. Historical developments and state of technology
Some aspects of the development of cold forging to a high-tech precision technology
K. Lange (Stuttgart, Germany) 245
Academic–industrial cooperation to improve and expand cold-forging technology in Japan
H. Kudo (Tokyo, Japan) 259
Application of the 2D finite element method to simulation of cold-forging processes
T. Altan and M. Knoerr (Columbus, OH, USA) 275
International cooperation in cold forging technology: The International Cold Forging Group
N. Bay (Lyngby, Denmark) and K. Lange Stuttgart, Germany) 303

2. Advances in processes and applications
Cold- and warm-forging applications in the automotive industry
S. Fujikawa, H. Yoshioka and S. Shimamura (Yokohama, Japan) 317
Some applications of cold and warm forging
M. Hirschvogel (Denklingen, Germany) and H.V. Dommelen (Columbus, OH, USA) 343
Simulations of cold forging processes by the DEFORM system
S.I. Oh, W.T. Wu and J.P. Tang (Columbus, OH, USA) 357
Modern applications of radial forging and swaging in the automotive industry
E. Rauschnabel (Königsbach-Stein, Germany) and V. Schmidt (Stuttgart, Germany) 371
Current cold-forging techniques for the manufacture of complex precision near-net-shapes
S. Onodera and K. Sawai (Nakashima, Japan) 385

3. Equipment and tooling
Cold and hot forming machines
D. Schmoeckel (Darmstadt, Germany) 399

Cold- and warm-forging press developments and applications
T. Nagahama and S. Enomae (Wood Dale, IL, USA) 415
Cold forging of net or near-net shape components
V. Maegaard (Nordborg, Denmark) 429
Cold forging of gears and other complex shapes
I. Moriguchi (Fort Wayne, IN, USA) 439
Possibilities of warm extrusion in combination with cold extrusion
E. Körner and R. Knödler (Göppingen, Germany) 451

4. Workpiece and tool materials
Hot forging of precision parts
E. Doege, J. Thalemann and F. Weber (Hannover, Germany) 469
Stripwound cold-forging tools – A technical and economical alternative
J. Gronbæk (Nordborg, Denmark) 483
Increasing tool life in cold forging through advanced design
and tool manufacturing techniques
K. Lange (Stuttgart, Germany), A. Hettig (Singen, Germany)
and M. Knoerr (Columbus, OH, USA) 495
Tool materials and surface treatments
T. Arai (Aichi, Japan) 515
